Professional Summary

Full-Stack Software Engineer with 3+ years of experience developing and maintaining web applications. Experienced in ASP.NET, C#, React, and SQL performance optimization. Focused on improving system performance, reliability, and delivering production-ready features across the full stack.

Experience

Software Development Engineer | Lanex Corporation (Jan 2023 – Dec 2025)

- Developed and maintained full-stack enterprise web applications supporting internal operations and external client-facing projects.
- Reduced critical API response times from 30–40 seconds to under 10 seconds by optimizing SQL queries and tuning stored procedures.
- Improved frontend performance and page load speed through component and API handling optimizations.
- Implemented authentication and role-based authorization mechanisms.
- Integrated third-party APIs including payment-related services.
- Participated in daily pull request reviews and led selected feature modules from requirements to deployment.

Associate Software Engineer – Intern | Lanex Corporation (Aug 2022 – Dec 2022)

- Built full-stack features using React.js (Ant Design) and Express.js.

Freelance Full-Stack Developer | Medical Industry Client (October 2023 – Dec 2023)

- Designed the UX/UI, implemented SEO best practices, and developed a responsive, animated frontend website with interactive components and contact functionality to enhance user engagement.
